# Business Plan

Wright Containers, LLC is a Houston-based packaging supply company that provides a wide variety of packaging options for the following industries: adhesives, agricultural, chemicals, food products, hazardous materials, lubricating oils and greases, paints/coatings, petroleum products, oilfield chemicals, pool chemicals, solvents, resins and various chemical commodities.

At Wright Containers, our goal is to be the leading supplier of industrial packaging products consistently out performing our competitors by delivering products and services that meet and exceed the expectations of our customers, promote respect and value to our employees and build a profitable infrastructure for our investors through exceptional customer service and high quality products.

As a distributor, Wright Containers leverages buying power allowing the customer to receive competitive pricing. Unlike manufactures, Wright Containers encompasses a great deal of flexibility with our goods and services which allows modification of stock pricing, palletizing, custom design and other benefits. Manufactures simply are not equipped to be as nimble dealing only in high-volumes with no alterations or deviations from what they normally produce.

Wright Containers distributes a full line of industrial packaging products from open head or tight head pails, F-Style bottles and Jerry Cans, hazardous material or consumer packaging acquired from high quality manufactures. As a partner to our customers, we provide knowledge, communication, efficiency and depth of resources that are critical to their business operations.

With locations opening throughout the Texas and Louisiana Gulf Coast, Wright Containers is able to ship from any of our warehouse locations saving the customer high cost of shipping. Warehousing a wide variety of containers and products, our customers have access to what they need 24 hours a day, 7 days a week. We also have the capability of direct shipping our products from the manufacturer to the customer.

Wright Containers offers a complete product line of new, reconditioned and rebottled 275 and 330 gallon IBCs as well as poly drums and steel drums available in sizes 5 gallon to 55+ gallon for the safe transport of the most sensitive goods.

# Steel Drums

- Made from cold rolled steel for holding and handling of dangerous products, especially in the chemical and petrochemical fields
- Meet the most stringent packaging requirements
- Excellent stacking capability
- Recyclability that satisfies ecological concerns
- Superior protection against corrosion
- Outstanding paint adhesion
- Open Head and Tight Head
- Lined and Unlined

*“Our steel drum program – a perfect fit for great logistics.”*

Quality, security, innovation and sustainability included!

# Polyethylene Drums

- Packaging for liquid and powder/solid filling goods
- UN approved for liquids and solids - depending on packaging type
- Versatile options and a wide range of accessories to meet all customer requirements
- Available with barrier layer or as conductive (EX) version
- Available in 15, 30 and 55-gallon
- Leverlocking and various bungs
- Tight Head and Open Head for standardized handling and conveying

*“The L-1 55-gallon tight head container is the industry standard, chosen by packaging professionals nationwide for its highest levels of performance and value.”*

# Anti Static Grounded Totes

- Multi-layer Bottle incorporates an external layer of permanent antistatic plastics compound
- Cenelec-certified Design includes discharge valves and pallets especially designed for grounding the unit
- Available on composite or steel pallet

# Reconditioned and New Bottle Used Cage Totes

Reconditioning using  
Hydrostatic pressure testing:

- Totes are visually inspected, graded, and sorted for processing
- Once passed the totes are cleaned using a proprietary chemical treatment
- Final test is submersion of each tote under water and applying air pressure. This system is the only method in the market that assures no pin holes or leaks 99.9%

*“Wright Containers will pick up your dirty  
and empty IBCs.”*
